- Reinforced construction (base, blade, sides)
- Large capacity: 900 to 3200 litres
- Several widths: from 1500 to 2500 mm*
- Optional removable and reversible blade

*Depending on the model of MANISCOPIC

Equipment designed to European standards and to the specifications of your Maniscopic

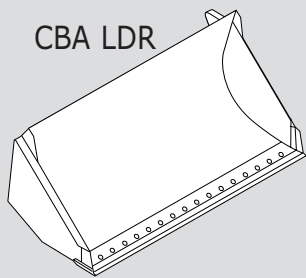

Specially designed for picking up bulk products, the CBA can be fitted onto any MANISCOPIIC.

It is shaped for fast filling and emptying, to give the user maximum performance.

This is the ideal tool for building a silage clamp, loading a trailer, scraping down a chicken house or collecting cereals.

The reinforced construction of its sides gives it solidity and strength.

To protect the front edge of the blade from wear, you can choose a removable and reversible blade.

Warning! You are advised not to use this attachment for earth-moving or picking up bulk materials with a density greater than 0.8.

To find out which equipment suits your MANISCOPIIC, get in contact with your dealer.
The specifications shown here are not binding on the manufacturer and may be altered without notice.
